Stacy Engman's 2025 Book Signing World Tour, Digital Exhibition ART ROYALTY - THE NOVEL, EDITED BY PAT HACKETT, THE ANDY WARHOL DIARIES

Global Book Tour Calendar

World Tour - Celestial Themed Art History From Moon Landing and visiting locations referenced in Stacy Engman's ART ROYALTY Book

Illustrious locations included in Stacy's book that would be ideal for book signing and exhibition. Staging include

LONDON - Sothebys Bond Street, where it all began, tying in with her masters degree in London fair at Sotheby's Institute,

PARIS - Palais De Tokyo where Stacy held the first art meets haute couture exhibition, and famous dinner at the Hotel Costes

DAVOS - includes the World Economic Forum at Davos where Stacy is an art curator and speaker

BEVERLY HILLS - Hollywood and Beverly Hills - Stacy has curated exclusive villas in Beverly Park Circle

NEW YORK - The Plaza Hotel, which is in the book from Stacy's Gallery their pre-Covid

MIAMI / PALM BEACH - The Norton Art Museum, longtime fans of Stacy's Curation and Digital Presentations

HONG KONG - Stacy is the art curator at Lane Crawford Joyce in Hong Kong and China and can do book signings there

Book Signings, Dinners, Panel Discussions, and Events

Invitees to events and particularly dinners include "The Art Royalty Set" - influencers in art, fashion, artists, movie stars, and important friends of Stacy Engman she has affectionately dubbed with this title. For example, the final page of Stacy Engman's book Art Royalty has included many of Stacy's close friends and associates ranging from Bas Lehman to Larry Gagosian, to artists and fashion designers she works with such as Christian Louboutin and Philip Tracey, to Eric Fischel who painted Stacy with Jay Jopling in his Art World Series, pictured.

ART ROYALTY - THE NOVEL, EDITED BY PAT HACKETT, THE ANDY WARHOL DIARIES ABOUT THE BOOK AND EXHIBITION

ART ROYALTY - The Novel chronicles Stacy Engman's art practice since her early years studying as a Masters Student at Sothebys Institute in London. Featuring 22 chapters, and culminating in the historic art on the moon that marked the first lunar landing in 50 years and first official art on the moon. Stacy's book signing is a planned world tour that includes key destinations in her global stomping ground covered in the book, as well as tying into events such as major art fairs, fashion weeks, esteemed conferences such as Davos, where she has attended, spoken, and worked on projects and exhibitions throughout her illustrious career.

Art history goes to the moon! The Art Index (+AI), "the NASDAQ or Bloomberg of the Artworld" created by Stacy Engman, was included in the first lunar landing of art in history on February 22, 2024. Celestial Themes from +AI were aboard the Space X Falcon 9 in artifact form engineered to withstand one billion years, and also preserved on the blockchain As a special spotlight.

In addition to the book signing where Stacy will appear with close friends and fans in each region, she will also exhibit select artworks referenced in her epic novel, edited by the iconic Pat Hackett, Editor of the Andy Warhol Diaries, the Bible of Contemporary Art History and most influential collectors manual. As this is the first book Pat has edited since the Warhol Diaries, it is an instant classic and already slated as a New York Times Bestseller.

Art Historical Celestial Themes - Art History Goes To The Moon

The celebrated NFT artist and noted expert art historian Stacy Engman created the thematic show of art historical masters featuring celestial themes to commemorate this historic mission. Engman is known for creating the first art historical archive on the blockchain and establishing price consensus for her record breaking prices of 1% floor (\$4.5m each). For the Lunaprise launch, her series of 100 unique pieces feature her art historical selections and the Stacy Engman Masters Seal, that authenticates the high value status of each artwork and establishes historical merit. Commemorating the historic mission, the pieces have been embellished with moonstone halo motifs, which collectors will be able to purchase, and 10 works are being offered for preview and early purchase privately of the moon mission that landed on the moon and made 50 year history since the last lunar landing on Space X Falcon 9 on February 22, 2024, in which Engman is also one of the featured artists selected to go to the moon along with Jeff Koons, the most expensive living artist. True to her art series valuation philosophies of being pegged to actual fine art indexes, the floor price of this edition is aligned at \$4.5m.

Stacy Engman is a truly iconic artist, curator and style innovator. An Alumna of the prestigious Sotheby's Institute of Art (London) where she graduated with a Master's degree in Fine Art, she has constantly broken new artistic ground with her original creations. It was whilst in London studying fine art that she first combined sunglasses-with-gems and sunglasses-with-tiara to produce what are

now her well-known, trademark creations. This theme was extended to her crypto creations when she became the first artist to put Old Masters onto the blockchain. Another innovation by Stacy Engman was to peg the price of these seminal art history artworks at just 1% of their Old Master, traditional artworld counterparts. Likewise in 2020 when she brought her Avastar NFTs to life and launched her Avastars PFP Project the theme continued as they were adorned with actual wearables of her real world trademark sunglasses-tiaras, gems and jewellery. Her crypto art innovations have earned Stacy a deserved place in the Crypto Hall of Fame and her debut at the Crypto Art Museum in 2021, and she was also selected as the first BMW NFT Art Car Artist featuring her Masterworks series of Van Gogh, is the Samsung NFT Ambassador, the featured keynote speaker at NFTnyc for having the most expensive NFTs in the world, and a commenter at NASDAQ on market pricing levels. Stacy Engman's previous exhibitions and projects have been presented at the Andy Warhol Museum, Salvador Dalí Museum, the Museum of Modern Art (NYC), PS1, The National Arts Club, Palais de Tokyo, Asia Society, The Crypto Art Museum, The Mellon Estate, Brant Foundation and other esteemed institutions. Stacy Engman has been recognised by seasoned collectors and Crypto Leaders.
